To Whom It May Concern,

I am writing to provide a letter of experience for Harsh Jain, who served as a “Web Development Intern – Frontend” at ESQB Technologies from February 2023 to June 2023.

During his time with us, Harsh displayed a strong passion for web development and a remarkable dedication to his work. He consistently demonstrated a high level of professionalism, commitment, and a strong desire to learn and contribute to our team.

As a Web Development Intern - Frontend, Harsh worked closely with our development team on an enterprise software application, contributing to the design, development, and optimization of our front-end interfaces. His skills in HTML, CSS, JavaScript, and other relevant technologies were evident in the quality of work he delivered. He applied his skills for not just development, but also the design of the application ensuring that the user experience remained a top priority in all his endeavors.

Harsh's ability to stay up to date in an AGILE development cycle proved noteworthy, as he applied his versatility and time-management to meet the fast-paced demands of the situations. He was able to handle multiple tasks simultaneously and showed a remarkable ability to adapt to evolving project requirements.

Apart from his technical contributions, Harsh also demonstrated great teamwork and interpersonal skills. He engaged in brainstorming sessions, actively participated in team meetings, and readily shared his insights.

In conclusion, I believe Harsh Jain has gained valuable experience during his internship at ESQB Technologies. His dedication, technical prowess, and collaborative spirit make him a promising talent in the field of web development. I am confident that he will continue to excel in his future endeavors.

I wholeheartedly recommend Harsh for any opportunities that align with his skills and aspirations. Please feel free to contact me if you have any further questions regarding his performance during his internship.

Sincerely,

Pratik Thakur
